

Racial Harmony through Respect and Distance

Everyone wants to be respected and supported by their neighbors, including the majority of people who live in an area. This means total respect and sensitivity to the issues confronting the majority population. The majority does not have to coexist with foreigners or other races in order to prove anything to anyone.

White Americans are the largest number of people in this area, and we deserve to be the undisputed rulers of our own house. In a democratic nation, only the will of the majority counts.

The National Alliance is a Majority Sensitivity Agency that still stands for the rights of all persons who make up the majority population in this area.

This probably means you. If you are white in a white area, we stand up for your right to rule your people. If you are black in a black area, we stand up for your right to rule your people as well. We believe that minorities should never enter nor be involved in majority areas or issues. The majority rules in a locale no matter what their race.

Please support our efforts at creating an understanding between peoples of all creeds, colors, and languages, based on the understanding that the majority rules in a democracy and that people have a right not to be integrated against their will because such integration is a form of social, cultural, religious, and racial suicide. The right to associate with your own kind without being called a racist or bigot by a minority or its henchmen is a natural right of man predating all governments, a right that should not be sacrificed to the whim of politically correct legislation. A minority should not be able to impose its will over that of the majority.

The National Alliance stands for...

Separate nations and rulers and destinies for all peoples, ethnicities, and religions. Every race has a right to its own destiny, its own nation. There, they are guaranteed total sensitivity to their needs, because they are represented by their own kind. Their nations harbor no hate, because there are no minorities in them to spread dissension.

Multicultural nations like Iraq produce tyrants, hatreds, deaths & civil wars.

THE NATIONAL ALLIANCE.

Stand With Your Race.
